

PEDESTRIAN TUNNEL

Protect pedestrians from falling debris, tools or materials while contractors work overhead.

The Pedestrian Tunnel units can be connected together, using its precise anchorage system, to create a complete run of protection for the passing public whilst contractors are working on site overhead.

-  **5 Kg**
-  **31Kg**
-  **Stackable**

Specifications

Size:	2150mm [W] x 1780mm [H] x 1140mm [D] Height adjustable to 2280mm
Weight:	31Kg
Drop load:	Tested 5Kg from 25m height
Material:	Aluminium and highly resistant alveolar polycarbonate cover
Rating:	Wind resistance up to 120Km/h

How are they installed?

With just one person, easily and conveniently move the tunnel to the desired location.

Unfold the telescopic legs and line up with other units to form the tunnel.

We recommend fixing the units to scaffolding or adding accessories that strengthen and improve stability.

Installation timings

No tools are required. Accessories are available – please contact us with your enquiry.

2 people recommended. Telescopic and folding legs aid assembly

Single line of 3 connected in 5 mins (depending on ground conditions and site layout)
