

PYRAMID BARRIER

A unique 'water filled' barrier solution providing demarcation and added site safety for both pedestrians and vehicles.

-  Easy lock
-  5Kg
-  55Kg
-  90°

The Pyramid Barrier is simply connected together creating an effective separation between the public and the working site. They are designed to rotate a full 90°, enabling contractors to box off projects and providing added security, a mesh fence top can also be added if required.

Specifications

Size:	1m [L] x 560mm [H] x 400mm [D]
Weight:	5Kg when empty / 55Kg when water filled
Material:	High Density Polyethylene (HDPE) and 100% recyclable

How are they connected?

The Pyramid Barriers connect together with a simple drop in and click operation using the male/female connection points at each end.

The unique way it's been designed allows straight or rotation to full 90°, as well as being able to connect to the majority of existing barriers on the market.

Easily join together and fill with water.

Installation timings

No specialist tools are required. A Water source is needed.

1 person or more required

Connection of one to another in 30 seconds

100 linear metres in approx. 1.5 hours (depending on ground conditions and site layout)

Eco-friendly and long lasting

Made from High Density Polyethylene (HDPE) which is also 100% recyclable.
