# TEMPORARY TRAFFIC MANAGEMENT SIGNS

**Metal and plastic traffic sign frames, ideal to display information for any temporary siteworks, to control the flow of traffic and pedestrians.**

4.85Kg

Fits multi face signs

The Temporary Traffic Management Signs are foldable frames that can be moved and propped up without difficulty beside work areas.

Interchangeable single or double face sign panels can be secured into the frame to display clear signage information.

## Key Features

- ✓ Temporary road sign to clearly mark useful information for multiple scenarios
- ✓ Metal or plastic available
- ✓ Long lasting to withstand weather and tough site conditions
- ✓ Comes in a variety of shapes and sizes
- ✓ Easy open and clip system
- ✓ Fits almost any face sign display
- ✓ Compact for easy transport and storage

## Budget Options

Perhaps you don't have the budget to purchase outright, we always have a variety of solutions for you.

- **Hire for short or long term**
- **Used/second hand**
- **Lease or Finance**

## Top Tip

By using our SignBlok wind resistance is greatly increased and support on an uneven surface is improved.

As an accompanying option, please take a look at our SignBlok, Road Cones, Extendable Cone Bar, Chapter 8 Barrier or GRP Trench Cover.

**Utility Projects**

**Construction Sites**

**Pedestrian Walkways**

**Roadworks/Traffic Management**

**How are they installed?**
Clip the face sign securely into the frame using the metal clips. Move the legs apart until its hinge opens to the right angle for support. Stand the sign up for it to be displayed.

The traffic management sign should be placed between the works area and the public route, to indicate a diversion to pedestrians and vehicles.

We recommend using the SignBlok for additional weight to increase stability and protect from wind.

**Installation timings**
No specialist lifting equipment required.

**1 person required. Lightweight to aid manual handling**

**Install with sign face in 1 minute**

**Long lasting alternative**
Should you need a very long lifetime product, the all-plastic road traffic sign does not conduct electricity and has no sharp edges, making it safer and more durable for siteworks.
