

## Retractable Barrier Post & Base

### Overview

The Retractable Barrier Post & Base system is the perfect complement to the retractable tape unit.

Its sleek, professional design looks sublime in any environment, both indoors and outdoors. Sold as a two-part system for improved transport and storage, the base can simply be filled with water or sand for improved strength and stability, then the post is twist-locked into position. The retractable tape unit or post & base cap attach to the top of the post with a secure, snap fit.

### Key selling points

- Made specifically for the retractable tape unit and waste & safety management range
- An attractive alternative to using standard traffic cones
- Perfect for use in indoor or outdoor environments

### Key features

- Each post comes with 2x reflective, high visibility strips
- Pour water or sand into the base for extra stability
- Holds the retractable unit securely in place

### Product FAQs

**Q. Can I use a combination of cones and posts?**

**A.** The post is 1m tall. It's designed to be used with other retractable unit posts but can also be used with traffic cones of the same height.

**Q. How heavy is the base once it's filled with water or sand?**

**A.** If using water, the base weighs approximately 12.3kg (27.1lbs) when filled to the maximum level.

### Product Specifications (post)

<b>Width: 125mm</b> 4.9"	<b>Height: 1m</b> 39.4"
<b>Depth: 125mm</b> 4.9"	<b>Weight: 1.1kg</b> 39.3oz

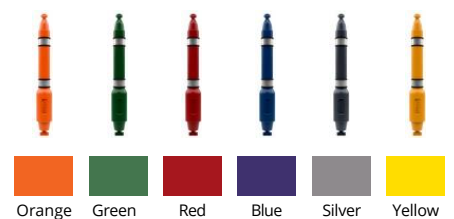

### Product Specifications (base)

<b>Width: 500mm</b> 19.7"	<b>Height: 125mm</b> 4.9"
<b>Depth: 500mm</b> 19.7"	<b>Weight: 1.2kg</b> 42.5oz

The post twists into the base. The retractable unit then simply clicks into place on the top of the post with an interference fit.
