How are they connected?

Simply lift the Kerb Guard over the curb and lay together in a line. Corner pieces can be added. They can be secured with additional accessories that require drilling into the ground.

Where the pavement has been top-coated, spacers should be inserted before haunching with tarmac.

Installation timings

No specialist lifting equipment required. A drill is needed to secure the Kerb Guard into place.

1 person required

Connection in a matter of minutes

Linear m

100 linear metres in about 2.5 hours

Site speed limit must be adhered to
