Building strong
foundations together*

ELITE GSS LTD SITE SETUP & INSTALLATION

THE ELITE GROUP OF COMPANIES

The Elite Group of Companies starts at the heart with Elite GSS Ltd, founded in 2014 with a specific range of Non-mechanical Plant and Equipment solutions targeted at the Construction & Groundworks, Utilities, Civil Engineering and Infrastructure sectors.

The business has grown consistently each year in terms of revenue, clients, and product range, in turn we've quickly become a market leader for various industries and customers. Despite adverse market conditions and industry challenges, for example, the pandemic, Brexit or highly volatile material prices, our consistent hard work, innovation and focus on maintaining key partnerships and relationships, both with customers and our supply chain, has helped us continue to push forward and remain competitive within the market.

In recent years, numerous major changes have taken place establishing further growth of the business, this includes moving to a 40,000ft² location enabling the whole team and stock control to take place in one headquarter location. We've also invested heavily in our own fleet of vehicles for nationwide delivery, additional rental stock to support our customers and key projects, plus expansion of our installation services. This continues to ensure a consistent high level of service and support, speed of delivery and availability of stock.

As part of our growth and looking at other opportunities in the market, our next natural steps were to expand into a group of companies supply additional unique and innovative products, materials and complimentary services to our existing customers.

MultiMatts Ltd was established in 2017, specialising in ground protection, temporary access matting and event flooring systems. The range of internal and external products are for sale or hire with a key focus on recyclability and sustainability, beyond the core values of Elite GSS.

The company initially started as an online eCommerce business, which has gradually expanded into the company we know today, providing expert and knowledgeable advice and solutions from our team of consultants and the installation teams we have based around the UK. Not only do we support the commercial and industrial sectors, but we're also helping to support the Events, Leisure, Energy & Environmental, plus Renewable industries.

Elite Timber Supplies Ltd was established in 2021, supplying constructional timber, landscaping, and building products into the Building and Construction industries and our existing customer base.

The company was introduced as part of our expansion of the group, this has helped to offer an alternative source of materials and bespoke services to our customers, no matter what the requirements, we can ensure we serve our customers' needs throughout the project.

Quality sourcing methods globally contribute to continuously working towards a better future along with being certified for leading chain of custody certification schemes, including PEFC™ and FSC®.

The company is incredibly proud of the nationwide service provided by our skilled team, helping both locally based businesses, as well as being involved with large scale projects and national housebuilders.

Revive Recycled Plastics Ltd was established in 2022 with joint ownership, the business and its core vision is to focus on converting post-consumer plastic waste into a diverse range of durable products for a wide variety of applications. The core values are similar to other companies within the Elite Group, but with an added focus and drive to considerably reduce the amount of waste sent to landfill or incineration and help the UK's net zero ambitions.

Key sectors like Government, Education & National Parks have helped the company grow and develop its range of products with many of them being durable & long-lasting, water-resistant, and often cost-effective compared to traditional alternative materials such as timber.

The Elite Group of Companies has ambitious plans to grow with significant investment planned over months in 2026. Along with continuous improvements and learning from both internal and external training, motivation and good communication, we believe this will enable us to achieve these goals and create a positive and supportive working environment, along with the opportunity to capitalise on the UK & International market.

We believe that, with our focus and vision, we'll continue to expand our range of environmentally friendly and sustainable products not only for Revive, but throughout the Group of Companies.

The newest company of the group is Elite Insulation Supplies, established in 2024, reselling top-brand and quality insulation products to both trade and public customers. This company is an extension from Elite Timber Supplies for the building sector, offering nationwide services with fast delivery options that are competitively priced.

Its eCommerce website is aimed at straightforward product selection with a simple ordering and payment process, but without being overwhelming for novices or too simplified for professional tradespeople on any device.

Temporary Access

Create a stable, load-bearing surface over soft or sensitive ground so that crew, vehicles, and equipment can move safely without delays.

E-Mat Double Sided Access Mat

EuroTrak® Heavy Duty Access Mat

Applications

Construction, utilities, oil and gas, renewable energy, landscaping, and emergency response industries to provide safe ground access.

Heavy
Duty

Medium
Duty

Vis-Trak® Heavy Duty Access Mat

Ground Protection

Spread weight and protect underlying surfaces for vehicles, equipment, and foot traffic to move across an area without causing ruts, compaction, or surface damage.

DuraMatt® Medium Mat

Safe Walk Matting

Applications

Construction, landscaping, events, sports turf management, and maintenance industries to protect surfaces from damage.

Medium
Duty

Light
Duty

Safe Site Matting

Trackway

Deliver a roadway enabling continuous, stable access for heavy duty vehicles and equipment over soft, uneven, or sensitive terrain while reducing ground damage.

K-Mat Trackway Panels

Hardwood Timber Bog Mats

Applications

Construction, infrastructure and utility projects, oil and gas, and renewable energy industries where temporary access roads for heavy duty plant and machinery are needed.

Elite Installation & De-installation Service

Our installation and de-installation service is a cornerstone of what we offer. Our team takes care of every detail to ensure the job is completed safely, efficiently and to the highest standard, whatever the size of the project, the space available or the time of year. This service includes:

Full site inductions completed with signed RAMS for every job

Pre-site planning using surveys or Google imagery to assess site layout

Experienced team holding relevant CSCS certification and industry training

All PPE and safety equipment provided to ensure safe and compliant working

Specialist install equipment provided as required, with certifications

Digital photos recorded throughout the project for client documentation

Post-install inspections completed with client sign-off

Flexibility to adapt to last-minute site changes when required

Our Commitment to Quality

Our installation team brings extensive experience across the full range of products we supply, delivering every project with professionalism, precision and a strong focus on safety. Fully trained and certified, they ensure each installation is carried out to the highest standards, giving you complete confidence from start to finish.

What truly sets us apart is the level of support we provide to our clients. We understand that every site is different, and we work closely with you to make sure the installation fits seamlessly into your project. From planning and preparation through to completion, our team goes above and beyond to make the process straightforward, efficient and tailored to your needs.

We do the work, so you don't have to!

For many sites, finding the time, team or resources to install equipment can be a challenge. That is where we step in. Our dedicated installation team and vehicle fleet allow us to deliver and install equipment efficiently, helping keep projects moving without adding pressure to your workforce or schedule.

Whatever the environment, project size or timeframe, our priority is always the same. To deliver a reliable installation service that supports your site, solves problems before they arise and ensures everything is completed to the high standard you expect.

Accelerating our Sustainability Strategy

Sustainable Sourcing

Sustainable sourcing has been a top priority from the start. We intend to manufacture and use a larger range of products made from 100% recycled materials with sustainability in mind. By monitoring our environmental impact, our near future goal is to have an increased use of fully recyclable products or those made entirely from 100% recycled materials.

Waste Reduction

By ensuring our products are sustainably sourced, we have contributed significantly to reduce landfill waste, as well as our overall environmental impact as a company. To keep the planet cleaner and healthier, we've taken the approach to repurpose plastic waste into products without compromising on quality.

Construction & Design

For projects that require the local heritage and ecosystem to be preserved, you can depend on our products with low carbon footprint and on-site emissions — designed to protect the land and soil, helping to ensure healthy regrowth once the project is complete.

Closed Loop Recycling

Choosing our Hire service helps limit the number of used products ending up in landfill. Furthermore, our cleaning option brings non-mechanical products back after use to look and perform like new. Make use of our buyback scheme to repurpose unused or waste products — following inspection, we reuse them in future projects as part of a closed-loop system.

The Elite Services

Whether you need large quantities or just a few products for your project, or perhaps don't have the budget to purchase them outright, we have many Service options available for both short term and long term. The process is easy too!

Equipment Hire

Whether you need our products for a project or event, or simply don't want to commit to purchasing outright, we offer a wide range available for hire to suit your needs.

- Hire for both short- and long-term projects
- We simply deliver and collect when you're done
- More cost-effective, no large upfront cost needed

Nationwide Delivery

We provide a delivery service you can rely on. With our stock held in our warehouse, we offer standard, same day and next day delivery nationwide, along with collection from our site.

- Flexible delivery options tailored to your schedule
- Reliable and secure transport to arrive ontime
- Efficient nationwide logistics with palletised systems

Lease & Finance

We've teamed up with an Independent Broker to offer up-to-the-minute competitive leasing and financing choices that allow you to progress without committing to a bank loan.

- Get the equipment you need without large upfront costs
- Fixed, manageable monthly payments
- Fast approval and straightforward process

Used/Second Hand

If your project doesn't require new equipment — for example, if it's for a muddy site — we'd recommend reusing or buying second-hand. It's a practical, cost-effective solution that still delivers great performance

- Cost-effective quality equipment
- Inspected, quality graded, and ready for reuse
- Sustainable choice for reduced waste and recycling

Buyback Scheme

A procedure whereby any equipment can be viewed or assessed on site and depending on the quality and condition of the materials, we'll then offer a financial sum to buy them back.

- Recover value from surplus or unused equipment
- Accept a wide range of products - not limited to Elite GSS
- Supports sustainability through creating a close-loop system

Expert Team

Our team is here to ensure you have everything you need for a smooth and efficient project. We'll work closely with you from start to finish, supporting you every step of the way.

- Expert knowledge across our product Ranges
- Offering practical advice based on real experience
- Supporting you from first enquiry to project completion

"Our aim is to provide our customers with unique and innovative products, always delivering the highest levels of performance and safety. We believe in building strong foundations together."

Kris Heard, Managing Director

Need to Natter

-  News, insights and events
-  Product reviews and offers, answered questions and discussion tips
-  Shared business and industry information
-  'How to' use our products, installations and vlogs
-  Real site photos and high-quality images of our work in action
-  Short form videos of sites and projects
-  Collection of photos we've taken that showcase our projects
